The Be-200 “Altair” is a Russian multipurpose aircraft used to combat forest fires, help with disaster relief, water search and rescue, as well as military purposes.

The first flight took place in 1998, production started in 2003.

The Be-200 has been in operation with many southern European countries in the Mediterranean, helping to extinguish forest fires.

It can effectively scoop 12 tons of water in 14 seconds.
